

## **Workshop/Service Engineer (Electrical): Bedford (Heat Sealing)**

Are you an Electrical Service Engineer who would now like a role with less travel? We are looking for an experienced Workshop/Service Engineer who has an electrical qualification and is used to working with commercial electricity for our busy and successful team in Bedfordshire.

Ceetak Ltd (Heat Sealing technology division) is a leading design, development and manufacturing business. Based in Bedford, the company has been established for 50 years, experiencing a healthy growth year upon year. Dynamic, fast paced, and engineering led, we operate in a broad range of markets including medical, battery, process and food packaging. The role is predominantly workshop based, building the designs created by our talented design team, however the successful post holder will be expected to be away from home occasionally in the UK and overseas (mainly Europe) for installs, servicing and repairs.

### **Reporting to the Engineering Manager, the duties of the Workshop/Service Engineer (Electrical) will include but are not limited to:**

- Installing and commissioning bespoke machines, sub-assemblies and components into customer facilities
- Training operators and engineers for correct and safe operation of equipment
- Supporting customers remotely, attending site for breakdown, repair, service and support
- Auditing customer machines and premises
- Provide feedback to design engineers for improvements and modifications and any updates to drawings and instructions when changes are made
- General workshop duties as required
- Assembly and testing of heat-sealing components and assemblies
- Goods in inspection
- Goods out packaging and crating / palletising
- Assisting colleagues as required with their duties
- Collection and delivery of goods
- Receiving and directing incoming calls
- Producing assembly kits for production.

### **Key Skills of the Workshop/Service Engineer:**

- A background in Electrical Engineering and an understanding of Mechanical Engineering
- Experience working with Electrics in a Commercial Environment
- Good communication skills
- Motivated and adaptable
- Team player
- Willingness to complete jobs outside of the job role
- Able to travel in the UK and overseas.

### **Qualifications / Education Requirements:**

- Certificate or Diploma in Electromechanical Engineering

This role is predominantly workshop based, however the successful post holder will be expected to be away from home from time to time in the UK and Overseas (mainly Europe) for installs, servicing and repairs.

**Starting salary: £30,000 - £37,000 (depending on experience). Bonus (up to 8% of salary) + Contributory Pension Scheme + Health Care Scheme.**

**If you meet the above criteria then please apply now by emailing:**
